Trim Options and Upgrades

SCRIBE

Scribe Molding is a thin strip of wood that covers gaps and inconsistencies where the cabinet meets the ceiling, floor or wall. This piece of wood is typically straight on one end which is placed against the wall, but the other end is curved to transition and fit tightly against the cabinet. Scribe can also be used for installation on crown and light rail moldings.

TOE KICK

Toe kick is the recessed area between the base cabinet and the floor. It is also referred to as the toe space. A toe kick is the recessed area at the bottom of a base cabinet. All toe kicks are manufactured unfinished and our TK8 will be needed to properly finish all Toe Kick areas.

FILLERS

A filler strip is a piece of wood that is used to cover an opening or gap. Filler strips are available in standard sizes, and they are easy to install. Carpenters cut down to make their own strips to match their specific needs meaning one filler can be cut down and used for multiple areas. Ex. WF342 could be cut down to two 1 1/2 inch pieces.

Trim Options and Upgrades

CROWN MOLDING

Crown Molding is a horizontal molding projecting along the top of a wall cabinet and typically shaped to function as a decorative feature.

LIGHT RAIL MOLDING

Light Rail Molding is a decorative molding applied to the bottom of wall cabinets. It can function as a way to conceal under cabinet lighting or used for a custom look on your cabinets.

DECORATIVE DOOR PANELS

Decorative Door Panel is a finished false door that is placed against the cabinet side. This product can also be used on the back of a cabinet most commonly a peninsula or island.
